

# We are seeking participants for a research study

## What is the study about?

The University of Pittsburgh Autism Research Program is conducting a research study to understand how trauma and adversity impact suicide risk in autistic adults. We will also study resiliency to find ways to reduce suicide risk.

**This is not a treatment study.**

## Am I right for the study?

We are seeking:

- Autistic adults ages 18–45
- With autism diagnosis or suspect you are autistic
- With or without thoughts of suicide

## What will happen in this study?

Participants will:

- Complete eligibility and diagnostic testing
- Complete interviews with clinical research staff
- Complete daily surveys on their phone for 8 weeks.

There will be repeat surveys and interviews with staff at 6- and 12- months after joining the study.

**There is no cost for participating. We offer payment for the study.**
